

Set Yourself Apart

www.solutionsthatperform.com

Soaring costs, regulation, and competition are turning up the heat.

Your competitive advantage depends on your ability to innovate while managing quality and consistency of output while reducing process inefficiencies.

RWD can help you become more efficient and productive through the application of the Toyota Production System (TPS) and integrated support solutions.

Our goal is to help you reduce waste and increase customer value. We work with you to drive long term cultural changes and provide a solid foundation for continuous improvement and sustainability.

Your Challenge	Our Approach	The Benefits
Consistent quality	Process mapping/improvement	Increased customer satisfaction and increased output due to less waste
Production waste	Utilize equipment to full capacity and streamline processes	Increased profits
Meeting demand	Improve process efficiencies to keep project on schedule	Customer satisfaction and market share
Production quantities	Assessing and streamlining inventory process	Reduce inventory costs by matching demand to level of inventory
Data management	Customized data management systems	Decreased reporting error leading to faster approval process
Efficiency and innovation	Implementing sustainable process efficiencies through lean and training	More time for innovation

Why RWD?

Our objective is simple. Help you achieve the maximum return on your training investment and optimize performance.

Lean experts

Our people are our greatest asset. 75% of our lean practitioners have worked for Toyota. Their knowledge of the Toyota culture and our ability to transfer the knowledge at all levels across a business will ensure you have the best lean support available.

Experience

We have delivered lean training and implementation programs to companies around the world, across a broad range of industries and functional areas.

Practicality

Our training programs feature a large element of hands-on training and support in the work environment which, when combined with our ability to transfer knowledge, ensures return on investment.

List of lean solutions

- 7 Wastes/ Conducting a waste walk, 5S
- Benchmarking (Self Assessments)
- Process Mapping/Value Stream mapping
- Standardized Work
- TPM
- Kamishibai
- One Piece Flow
- Autonomation/ Jidoka
- Kanban Pull Systems
- Visual Management
- 7 Quality Tools
- New Project Management
- Crossing Gate Simulation
- Andon
- Error proofing
- Kaizen workshops
- OEE
- SMED/ QCO
- 8D problem solving
- FMEA/ICOR mapping
- Lean Leadership 360
- Lean Leadership
- Productivity Modeling
- Layout design/implementation
- Plug Game Simulation
- Supplier Development
- New model/product introduction
- Priority setting
- Effective Meetings
- Master schedule
- Blue Sky
- Project Scoping
- Change Management
- Lean/ IT interface
- Lean in Action workshops
- Lean Learning Academy

RWD is a leading provider of performance improvement solutions designed to help organizations align their people, process and technology with their business strategies. Our solutions are used in more than 20 industries. Founded in 1988, RWD is headquartered in Baltimore, USA, with 23 offices worldwide. We have many Fortune 500 customers in more than 100 countries.
