

RWD Safety Training and Programs

www.solutionsthatperform.com

General Industry OSHA Standards Training (10-Hour or 30-Hour)

RWD's training program is based on standards for the general industry. Our OSHA-authorized instructors provide either 10- or 30-hour training sessions for your employees, each of whom will receive a course completion card to prove they have taken an OSHA endorsed course on OSHA Safety Standards.

Arc Flash (8-Hour)

This course provides training for NFPA 70E ARC Flash, the US regulation for safe maintenance of high voltage equipment. RWD provides ARC Flash Awareness Training for your team. Using an ARC flash study, we will help you implement an ARC flash hazard program to supplement your existing electrical safety program.

RWD can also conduct or assist you with the following to complete an ARC Flash Study:

- Short circuit study
- Coordination study
- Gap analysis
- Electrical ARC flash hazard analysis
- Support services for implementation

General Safety Training (Lunch and Learn)

Safety Specialists will discuss Lock out/Tag out, Guarding and Personal Protection for General Safety Programs.

Risk Assessment (8-Hour or 4-Hour at High Level)

RWD offers original equipment manufacturers (OEMs) and equipment owners Risk Assessment Analysis training for:

- Current production equipment
- Modification to current equipment
- New designs or processes
- Equipment that is complete prior to shipping

This class will give the fundamental concepts and tools required to conduct Risk Assessments.

National Electrical Code (24-Hour)

RWD also provides training for NEC updates and changes, and for high-voltage equipment maintenance practices.
